## SKILLS

**Languages**: C, C++, JavaScript, Java, PHP, MySQL, TypeScript
**Frameworks**: HTML, CSS, Tailwind CSS, React.js, Node.js, Express.js
**Tools/Platforms**: Git/GitHub, Figma, Canva, MongoDB, Linux
**Soft Skills**: Problem-Solving, Leadership, Communication, Adaptability, Team Work

## PROJECTS

**PriceMate – Smart Price Comparison Platform** | *HTML, CSS, JavaScript, React.js, Node.js, MongoDB* | Link — Dec' 25

- Engineered a smart web-based price comparison platform that aggregates and compares product prices across multiple e-commerce sources, enabling users to identify the best deals efficiently and reducing manual price-search effort by 45%.
- Built dynamic product search, category-based filtering, and real-time price range comparison to enhance decision-making accuracy and improve user engagement by 38%.
- Developed a scalable backend with secure API integration and structured data handling, ensuring reliable price retrieval, faster response times, and seamless frontend-backend communication.

**Daily Expenses Tracker - Personal Finance Management** | HTML, CSS, JavaScript, React.js, Node.js | Link — Apr' 25

- Implemented features such as interactive charts, automated expense summaries, and user-friendly UI components to help users track and manage daily spending effectively.
- Integrated AI-powered insights to automatically analyze user expenses, categorize spending patterns, and provide smart suggestions for better financial planning.
- Significantly reduced manual effort by automating expense tracking and report generation, enabling users to make quick and informed financial decisions.

## TRAINING

**Data Structure and Algorithms using CPP | CipherSchools** — Jun' 25 - Jul' 25

- Acquired strong understanding of fundamentals data structures such as arrays, linked lists, stacks, queues, Trees, and graphs.
- Developed hands-on skills in algorithm design, problem-solving, and time complexity analysis using efficient coding practices.
- Strengthened logical thinking and programming foundations, preparing for technical interviews and software development roles.

## CERTIFICATES

| | |
|---|---|
| DSA with C++ - Cipher Schools | Apr' 25 |
| Computer Communications - Coursera | Dec' 24 |
| TCP/IP and Advanced Topics - Coursera | Dec' 24 |
| The Bits and Bytes of computer networking - Google | Sep' 24 |
| Introduction to Hardware and Operating Systems - IBM | Sep' 24 |

## ACHIEVEMENTS

**Consistency and Excellence in Competitive Programming Practice** — Jul' 25

Earned "100 Days Badge 2025" by solving coding problems consistently for 100+ days in 2025, completing 100+ algorithmic and data structure challenges.

**Strong Performance and Collaboration in a Competitive Hackathon Environment** — Apr' 24

Achieved 5th position in 'Hackaverse Hackathon' organized by LPU by collaborating with team and implement an innovative solution.

## EDUCATION

**Lovely Professional University** — Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 6.83** — Aug'23 - Present

**Dellmond International School** — Saharanpur, Uttar Pradesh
Intermediate; **Percentage: 62.6%** — Aug'22 – Jul'23

**Green Field Academy** — Roorkee, Uttarakhand
Matriculation; **Percentage: 58.8%** — Apr'20 – Jul'21
